

Easy Marble

Marabu

Create fantastic marbling effects in a matter of seconds with Marabu Easy Marble. Simply drip the paint into water, dip an object in the mixture and it'll take on a beautiful marbled pattern. Objects such as plastic eggs and plastic balls, glass, wood, paper mache, blown eggs, candles, metal, polystyrene or paper can be given a high-quality look with little effort.

Marbling paints from Marabu are based on organic solvents that are dry to the touch after approximately 15 minutes. Once the objects have been allowed to completely dry, they can be wiped with a damp cloth but are neither wipe-proof nor wash resistant.

*Colors are included in the Starter Kit

Helpful Tips:

- Select a bucket that you don't mind getting that may not come off. Only use containers for paint that you use for Art or this type of project (plastic is a perfect choice).
- Use room temperature water.
- Disposable gloves are a must. Paint will stain skin and can be difficult to remove.
- Set up your and protect your working area by putting down layers of newsprint or plastic tablecloth.
- Have an area ready for the items your finished marbling to dry.
- Pick out the colors you plan to use before you begin each marble.
- Shake paint on to water and lightly stir paint to create marble effect with item such as a skewer.
- Slowly submerge item into marble bath. Once item is under water, stir/swish the item to push paint to the side of the bucket to prevent double marbling effect.
- Clean up remaining marble paint with newspaper scraps.
- If you have a tip you would like to share, please feel free to let us know!
